In worst 1-day toll for Israel, 24 soldiers killed in Gaza

Israel said 24 of its soldiers were killed in Gaza on Monday, marking the worst single-day death toll for the military since the war against Hamas began in October.

In around 4 p.m. local time in central Gaza, militants fired on an Israeli tank, and at the same time, there were massive explosions at two nearby buildings, a spokesman for the Israeli Defense Forces said on Tuesday.

The resulting blast near the border fence with Israel killed 21 soldiers. "The buildings collapsed as a result of this explosion, while most of the soldiers were inside and around the buildings," the spokesman said. The buildings likely exploded from ordnance that our forces set up to blow up the buildings and the terror infrastructure in the area," he said.

Israeli Prime Minister Benjamin Netanyahu said Monday represented "one of the most difficult days since the start of the war." The IDF has opened an investigation into the disaster, he said, adding, "We will do everything to preserve the lives of our soldiers."
