President Biden, flanked by Vice President Harris and House Speaker Mike Johnson (R-La.), delivers his State of the Union address Thursday night. The president never mentioned Donald Trump by name, referring to him as “my predecessor.”

President confronts age concerns in feisty speech

Analyzing the new bills, Rep. Marjorie Taylor Greene, R-Calif., a top Trump ally, asked the audience to applaud if they “believe the number 78 is too old for America’s leader.”

Biden, long a target of Trump’s attacks, reassured an audience that included many survivors of school shootings that he would “fight like hell” for gun control, including universal background checks.

The president will not fail the future

Tuesday marked the first full year of the Biden administration. As such, it was a moment to look back on how things have changed — and to look ahead to what comes next.

While the past year has been marked by the Trump administration’s most extreme policies, Biden has implemented many of his own policies, which will be crucial in his first year as president.

Biden’s approach to policy has been characterized by a mix of bold and incremental changes, with many of his proposals having bipartisan support.

The State of the Union address is an opportunity for the president to outline his vision for the country and to set the direction for his first year in office.

Biden’s message on health care

Biden has made health care a top priority of his administration, and his address will likely focus on the Affordable Care Act, which he supports.

He is expected to outline steps to bolster the Affordable Care Act, such as increasing funding for Medicaid, expanding coverage for low-income Americans, and making health care more affordable.

Biden’s plan for climate change

Biden’s climate plan will likely be a major focus of his address. The president has made reducing greenhouse gas emissions a top priority, and he is expected to outline steps to achieve the goals set in the Paris Agreement.

This will likely include a focus on green energy, such as solar and wind, and on reducing emissions from transportation and industry.

Biden’s approach to foreign policy

Biden has taken a more multilateral approach to foreign policy, working to reestablish relationships with international allies and to rebuild trust with international institutions.

His address is likely to focus on diplomacy and multilateralism, particularly in light of the recent tensions with China and Russia.

Biden’s message on immigration

Biden has made immigration a key focus of his administration, and his address will likely include proposals to reform the immigration system.

He is expected to outline steps to address the challenges of the refugee crisis and to secure the border.

The State of the Union address will be a key moment for Biden to set the direction for his first year in office and to outline his vision for the country.

This year’s address will likely focus on the president’s response to the COVID-19 pandemic, his economic plans, and his proposals to address climate change, health care, and immigration.

In conclusion, Biden’s State of the Union address is an opportunity for the country to hear his vision for the future and to set the direction for his presidency in the year ahead.
